

Model VM3-XX Three Phase AC Voltage Monitor, 50/60Hz All Standard Voltages

Made in the USA

- Converts 3 phase Input to Low Millivolt Output
- Input Tested and Rated to 5000VAC
- Uses UL Recognized Parts and Materials

The Series VM3 Voltage Sensor is a 3-phase voltage step down voltage transformer used to convert different phase voltage systems. The VM3 can convert Wye to Delta, Delta to Wye, Zig Zag or other conversions for all voltages shown below. Output to be low voltage low power.

This product has been perfected but is always custom made to order due to the large variety of possibilities.

Inputs: 120V, 208V, 220V, 240V, 277V, 380V, 408V, 440V, 560V, 650V
